

# INSTRUCTIONS FOR USE

*Congratulations on becoming a part of the BRIQ story, which cares about the environment and decreases your electric bill.*

## General

### Read and save the instructions for use

These instructions for use belong to this BRIQ device (hereinafter referred to as the device). They contain important information on safety, use and care. Before using, carefully and thoroughly read the instructions. Pay particular attention to safety instructions and warnings. Failure to follow the directions in the instructions for use can cause serious injury or damage to the device. Please use current or national regulations to use this product. Save the instructions for use to a safe place so you can use them later. The instructions apply to this device. Should you hand over the device to third parties, be sure to hand them the instructions for use as well.

## Security

### Intended use

The device is intended solely for the 9i ekran d.o.o. customers for the following purposes:

- for connection to a boiler or hot water heat pump. Any other use is expressly excluded and shall be considered as non-intended use. The manufacturer, seller and installer do not assume any liability for personal injury, loss or damage resulting from unintentional or improper use. Possible examples of unintentional use or misuse are:

- use of the device for purposes other than those intended;
- failure to comply with the safety instructions and warnings and operating, maintenance and cleaning instructions provided in the instructions for use;
- failure to comply with any specific regulations governing the use of the device and/or generally applicable regulations for accident prevention, health at work or safety regulations;
- device changes;
- repair of the device by a person other than the manufacturer or expert;
- use or maintenance of the device by persons who are unfamiliar with the operation of the device and/or do not understand related hazards.

### Other risks

Despite its intended use, unforeseen other risks cannot be completely ruled out.

**CAUTION!** For protection against electric shock, damage and fire hazard, the following basic safety precautions must be followed when using the device. Before using this power tool read all of the safety instructions and store them in a safe place.

## Safety instructions for the BRIQ device

**CAUTION!** For your own safety, use the device only after you have read the safety instructions.

### 1. Make sure

- a. if any part of the device is missing or is otherwise defective.
- b. if the electrical part or the connecting cable is defective. Before using the device, inform the manufacturer to eliminate defects.

### 2. Make sure that children do not have access to the device.

## Electrical connection

- Your device will be installed by a qualified professional.
- The device is connected between the power supply and the boiler/heat pump, thus not changing the user operation.

Two LEDs on the device show how it works:

- The blue LED indicates the status of the connection to the wireless network. Connection failed in case of rapid flashing.
- Red LED indicates relay status. If it is on, the tension is present on the output terminals.

There is a button on the device that can be used to add or remove power supply to the boiler or the heat pump. For this feature, we recommend you to use a dedicated application available on the website **briqapp.com**
